155 WALGREENS  
PROJECTS

"The attention to detail and patience made this very complex project a success. Thank you for staying on time and on budget so that Walgreens could move in without losing any business during the transition. Your ability to coordinate this project while keeping the existing tenants within the plaza open and flourishing while the parking lot, entranceways, and major underground utilities were completely replaced, proved that you were willing to go above and beyond the call to get the project done. Thank you again for all your efforts."
